

Pell City Bottling

This is a response I got from Dennis Smith. Dennis Smith lives in Buffalo, New York. I sent him a copy of the Pell City Bottling article in the St. Clair history book, that I was shown by the Pell City library. So I am typing Dennis response to help preserve the history of their town, because I believe that if we don't share our history our history will be lost. This is his response word for word.

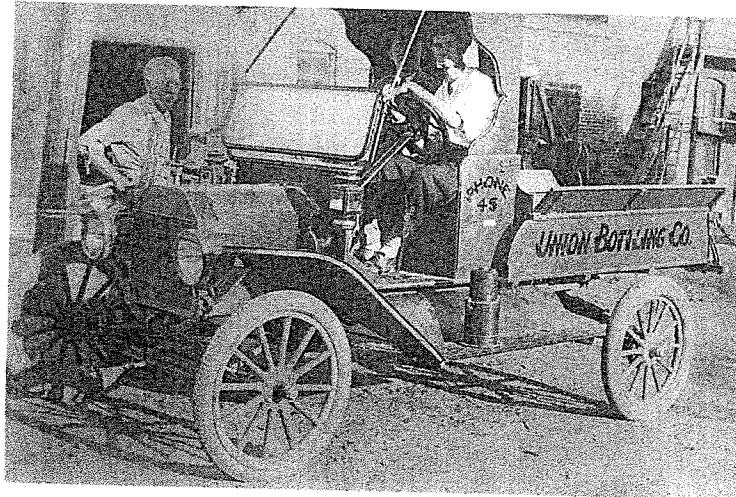

"I would love to get a good copy of that photo. The earliest information I have on Pell City Bottling Works was a mention in the 1906 National Bottler's Gazette. In 1909, the Pell City Coca-Cola Bottling Company was opened by John T. Mewborn and Smith Hall. That year they used 712 gallons of Coca-Cola syrup, enough for 91,136 bottles. They consolidated with the Pell City Bottling Works in September, 1909. They opened a branch Coca-Cola plant at Ragland in 1910. St. Clair County was in the territory of the Alabama Coca-Cola Bottling Company based in Anniston and Pell City was listed on the letterhead of the Anniston firm in 1915. Honeycutt apparently succeeded Mewborn at some point. The earliest mention of Honeycutt associated with the plant is 1922. The plant had apparently closed by 1930. I have no information on Union Bottling Company in Pell City. That may have briefly been the name of the merged plants in 1909."

Jake Smith

Heritage

St. Clair
Co.

Pell City Bottling Company

The Pell City Bottling Company was owned and operated by James A. Honeycutt. It was first opened in 1904, in the back of the present-day Jehovah's Witnesses' building. In 1908, he moved it to where John Martin's store is located. Rye Cola was bottled until 1910. Then they started bottling Coca-Cola.

Union Bottling Co.

There was one machine to do all the work. The bottling part of the machine was operated by foot. The first step in washing the bottles is putting them on racks. The racks went around to a vat, filled with water. Lye was then added to kill all the germs. The rack would go around to troughs of clear water. Each bottle was then put on revolving belts by hand. There the bottles went to brushes which finished the job. The clean bottles went to the tubs on conveyer belts. Then they were capped. One hundred cases were bottled per day.

In 1924, the company moved to a brick building across from Turner Gray's motel.

The employees included Frank Honeycutt, Dwight Honeycutt, Mr. James Honeycutt, and Embry Garrett.

Mr. Honeycutt quit the job and sold out to the Anniston's Bottling Company in 1927. This was due to the election of Mr. Honeycutt to sheriff of St. Clair County. *Submitted by: Margaret Mongold and Written by: Mike and Jimmy Reece*

Pell City Bridge Builders

Pell City, Alabama

The Pell City Bridge Builders Program has grown each year since its beginning in 1993. The idea for the program was conceived by Margaret Mongold and Emma Milam during the summer of 1992 when they saw idle children sitting in the streets quarreling. They first went to the city council about the lack of opportunities during summer months for children. Mayor Lawrence Field, Councilmen Mack Abercrombie, James McGowan, Johnnie DeGaris, Al Walls and George Williams were enthusiastic about a program for children. Their idea included the help and cooperation of the community's know how. The Rev. Don Cross hosted the invited church leaders at the First United Methodist Church in May 1993. They volunteered to provide a story lesson, a craft, refreshments and an activity for the Housing Authority, Miracle Hill Church of Harrisburg and Shadydale Trailer Park. The first summer approximately thirty (30) children enrolled with an average attendance of twenty (20). There were two workers. Pride in the programs success only fostered the realization of a much larger need within the community. A place to meet was first on the list. The previous space was just too small and because of the design of the building, the children often disrupted the work of the Housing Authority. The other two spaces were inadequate.

So Mrs. Mongold and Mrs. Milam set out again. The City Council said Bridge Builders could use the Recreation Hall on 19th Street. Rocky Zion Baptist Church said their educational building

Activities were expanding, swimming, stories and of course, a summer day participated. was used to transport city. First Baptist Church. In 1997 Dr. Phillips School System, invited. This gave the opportunity adequate space for children were involved.

The program would citizens, churches, the City Housing Authority time provided by each opportunities for these

Ah Me! 5-Cent Gives Up Battle To Inflation; Is Nickel Doomed Like Buffalo

The 5 cent coke, symbol of the good old preinflation days, bows off the stage today in east Alabama, like that good old nickel cigar and the other traditional Americana.

Alabama Coca Cola Bottling Company, with branches in St. Clair and other nearby places announced this morning an increase in the wholesale price of bottled Coca Cola from 80 to 96 cents for a 24 bottle case effective now.

This probably will have the result of increasing the retail price of Coca Cola by 1 cent a bottle, making the retail price 6 cents where it has been 5 cents.

Joe Rutledge, manager of Ala. Coca Cola Bottling Co., pointed out that except for a short period during the acute sugar shortage of World War I, this is the first change in the price in the history of the local Coca Cola Company.

He said that in spite of rising costs of materials and production

they had postponed the increase long after most other soft drink manufacturers had announced a raise. This postponement was done in the hope production costs would stabilize and that a price increase would be unnecessary. However, the company finds itself unable to postpone the raise any longer.

Mr. Rutledge pointed out further this increase, the first in over 25 years, is probably the smallest increase that has occurred in any food or household commodity over the same period.

Civil Court Set To Start In Pell City Monday

Improving Public Schools.

"Anniston is going to have the best
public school system in the state," said
J. H. Edmondson, who is a member of
the city school board. "Our \$175,000
high school building is under construc-
tion and we have just completed an
\$18,000 addition to the Pine Avenue
School. Plans have been perfected for
a six-room school in the Fourth ward,
and a four-room addition to the Glen
Addie School; all this in addition to
what we already had."

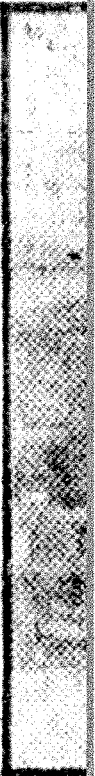

Mr. Edmondson is treasurer and gen-
eral manager of the Alabama Coca-
Cola Bottling Company, of Anniston,
which has plants at Gadsden, Talladega,
Collinsville, Guntersville, Abbeville,
Roanoke, Lineville and Pell City, as well
as at Anniston, and manufactures high-
grade ginger ale and soda water, in ad-
dition to bottling Coca-Cola. Mr. Ed-
mondson is a colonel on the staff of
Gov. Thomas E. Kilby, of Anniston, and
is also a member of the state Demo-
cratic executive committee. He and his
company are active in all things which
tend to benefit the cities and section
in which they operate.

Great Faith In Anniston.

Great faith in the present and future

COOK'S SPRINGS.

Cook's Springs Mineral Waters are now delivered in Birmingham fresh from the springs every morning. With the variety of mineral waters from these noted springs delivered at your door or place of business every day, you obtain just the kind best adapted to your particular case.

The reputation of these waters are too well and favorably known to require but little comment, except to let the public know they can get a water suitable to their needs and that they will not have to take a laxative when they need a diuretic, but they can get a water that will be suited to their several wants and not have to take a remedy for all diseases. The cures these waters are marvelous and since the white man has inhabited this country there hasn't been a single case of typhoid fever in the families that have used these waters regularly. The Cooke Water Company has opened a depot at 115 North 21st street, where these various kinds of water can be obtained fresh every day. Call either phone, 47, and have it delivered at either your home or place of business.

Hutchinson Data Definitions

Updated: January 25, 2018

Hutchinson Bottle Directory listings are catalogued by country, state, territory, province, county, region or area, city, and bottler. Individual bottle listings include all available data on front, back, and base embossing, mold style, glass color, height and diameter dimensions, plate mould shape, base shape, rarity, glass manufacturer, bottle images, and more. Additional thoughts:

- Each bottle has an assigned identification number to facilitate communication about specific listings.
- Embossings are described in capital letters with slash marks that represent line breaks in the lettering, e.g. "CENTRALIA / BOTTLING WORKS / CENTRALIA, WASH." means the embossed word "CENTRALIA" is above the embossed words "BOTTLING WORKS" all of which are above the embossed words "CENTRALIA, WASH."
- Punctuation is shown exactly as each bottle is embossed.
- Bottle mold style is specified as two leaf, three leaf, or four part mold.
- Height and diameter are shown in inches as decimals.
- Base shape is specified, e.g. Round, 10 Sided, 10 Panel Base, etc.
- Rarity classifications have been simplified to: "Rare" = less than 10 known; "Scarce" = 10-100 known, and "Common" = 100+ known. Dollar values are not shown because they are too dependent on individual bottle condition and constantly-changing supply and demand. We do not do appraisals!

- Wherever they have been provided, thumbnail photographs, scanned images, pencil rubbings, and drawings are displayed for each individual bottle. To view enlarged versions of the images, position your cursor over the image and a pop-up message will appear instructing you to "Click to see full sized images." Left click and a separate window will open displaying the enlarged image(s).

ALABAMA'S
PRE-CROWN TOP
DRINK BOTTLES

1840 - 1915

BY

THOMAS C. LINES

AN
ILLUSTRATED GUIDE
TO
KNOWN VARIATIONS

NAMES ON SUSPECTED BOTTLES

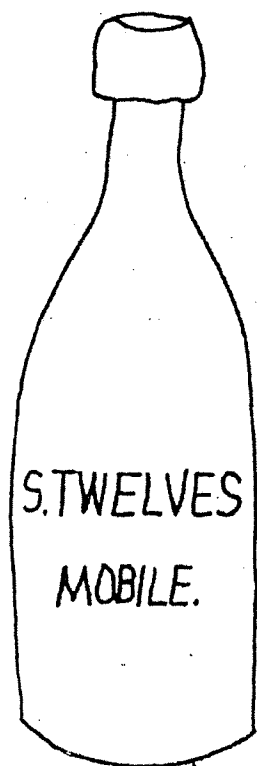

The following is a list of historically documented bottlers that operated during the "hutchinson era" or before. I suspect any or all could have used an embossed bottle, however none have yet come to my attention.

Alexander City	Cotton & Wilson
Aliceville	Star B.W. Almond, Seymour & McGillis
Anniston	Rund & Leyden N.T. Reid
Attalla	J.R. Brown Hoope & Butler
Bessemer	Bessemer Steam B.W.
Blossburg	Pioneer B.W.
Brewton	Brewton B.W./ H.E. Douglas
Calera	Calera B.W.
Citronelle	E.A. Bradley
Clayton	Crown B.W.
Collinsville	J.B. Marsh
Columbia	Crown B.W. A. Williams
Columbiana	M.R. Wexton
Dadeville	Coca-Cola B.W. / J.L. Fuller
Decatur	Twin City B.W.
Dothan	Brooks & Morgan Alabama B.W.
Enterprise	Enterprise B.W. Crown B.W.
Evergreen	C.L. Michael

Florala	Florala B.W.
Florence	Florence B.W. Florence Ice & Coal Co.
Foley	Foley Ice & Bottling Co.
Gadsden	Ledbetter Produce Co. Crescent B.W. Turrentine B.W. Gadsden Light, Coal & Ice Co.
Gordon	Gordon B.W.
Greenboro	Greensboro B.W.
Greenville	Butler County B.W.
Hartford	Nantz & Jones
Headland	Headland B.W.
Heflin	Heflin B.W.
Huntsville	Bowling & Sugg Buchheit B.W. The Pratt B.W. Cicero Hall & Son
Hurtsboro	Hurtsboro B.W.
Jackson	A.E. Chunn
Jacksonville	Model City B.W.
Jasper	J.T. McGraw
Lafayette	Lafayette B.W. Barton & Boyd
Lineville	Parker Bros. Archer & Daniel
Littlejohn	Pioneer B.W./ G.H. Davis
Louisville	L.M. Danner
Marion	Purity B.W.
Montgomery	Holt & Dufeu Meyer & Dufeu
Oakman	G.W. Kemp & Bros.

Opelika	Germany & Berry Hagan B.W. Purity B.W. Liberty B.W.
Opp	Opp B.W.
Pell City	Pell City B.W.
Prattville	W.M. Smith & Co. Purity Bottling Co./ Isiah Miller Prattville B.W.
Quinton	Celery Cola Bottling Co.
Roanoke	J.T. Nelson
Samson	O.J. Angle
Sheffield	Sheffield Bakery & B.W. Millar Bros. E.E. Doud
Troy	Jones B.W.
Union Springs	Union Springs B.W.

This list would add 36 more towns to the total and 74 more bottlers ; the potential for more than one variation per bottler is so high that I could safely estimate there could be as many as 100 more bottles that have not yet been discovered.
